

“lapesa” control panels are integrated into the different types of tanks in the “CORAL VITRO” series. They are supplied fully wired and mounted on the tank. The panels include all the necessary components to control the temperature of the DHW stored in the tank and for the thermostatic control of the installation's heating equipment. Any of the standard control panels fitted in tanks can be replaced by another type of control panel, if the installation so requires.

### CONTROL PANEL COMPONENTS:

- [Te°] Thermometer: 0 - 120°C
- [TL°] Control thermostat: 0 - 75°C
- [TL°] Safety thermostat: 90°C
- ❄️/⚙️ Switch: winter - summer
- Power on LED: green
- Primary pump LED: amber
- Electric heating element LED: red
- [P] Analog time switch: electric heating element.

### COMPONENTS ON CONTROL PANELS

CONTROL PANEL	INCORPORATED COMPONENTS								
Denomination	Thermometer	Regulation thermostat	Safety thermostat	Switch ON/OFF	SWITCH SUMMER/WINTER	LEDS	Analog time switch	Regulation	Standard installed on tank models "CORAL VITRO"
"T" PANEL	YES								CV-...-R/RB/P/HL
"TS" PANEL	YES	YES						hydraulic primary circuit	CV-...-M1/M2
"TD" PANEL	YES	YES	YES	YES	YES	YES		hydraulic primary circuit / electric heating element	(*)
"TPA" PANEL	YES	YES	YES	YES	YES	YES	YES	hydraulic primary circuit / electric heating element with time programming	(*)

(\*) Optional: Any of the standard control panels fitted in tanks can be replaced by another type of control panel, if the installation so requires.
